

Academy, Ltd. Container Inspection Incident Response

(To be completed and filed locally in the event that an unacceptable condition or unmanifested material is found during a container inspection and the container is not approved for stuffing, and to be utilized upon receipt of a loaded container to verify the integrity of the seals and to confirm and record any changes in the structure of the container or to record if any unmanifested materials are discovered with the shipment.)

Date:	Container Number:
Shipping Manifest Number:	Inspector Name:
Carrier Seal Number:	Inspector Signature:
Other Seal Number:	Cable Seal Number:
	Other Seal Number:

Type of Incident and Response

Type of Incident and Recommended Response	Actual Response and Resolution
<p>Contaminated Container (e.g. soil, pests, insects, eggs, snails and other parasites, vegetation, blood). Recommended response: Fumigate and ventilate, treat wood (insects cannot infest properly treated wood). Clean containers - sweep, wash, vacuum, etc.</p>	
<p>Evidence of Container Tampering (e.g. New Paint or recent weld repair) – Recommended response: A more detailed inspection of the container, looking for false wall including measuring the container to verify there is no false compartment prior to loading.</p>	
<p>Unmanifested Material (e.g. People, personnel, weapons of mass destruction, drugs or contraband discovered) Recommended response: If there appears to be a weapon of mass destruction, other unsafe material or contraband in the container, call local law enforcement or a hazardous material response team, notify senior company management and senior management who will notify the local authorities and customs and await further instructions. If there is an apparent immediate threat, evacuate the immediate area.</p>	
<p>Not Watertight or Unsafe structure Recommended response: If the container appears unsafe or not watertight, the container should not be used, but tagged for repair.</p>	
<p>Locking Mechanisms Broken Recommended response: If the container cannot be properly sealed and secured, the container should not be used. Tag container for repair.</p>	
<p>Seal Numbers not matched Recommended response: If the seal attached to the container does not match the shippers documents or the ASN, an investigation and report to CBP may be warranted. Documents should be reviewed to ascertain if the new seals are the result of a CBP inspection or other custodians may have added/changed the seals, or if there is no resolution for the new seals, further investigation and reports may be warranted.</p>
